We employed to carry out major internal alterations and refurbishment of the Grade II (1853) Chapel. The purpose of the works was to bring the facilities up to modern standards so the church could diversify its everyday use and generate more money from other functions/uses. The works included:

- The provision of a new commercial kitchen
- The installation of toilet facilities
- The installation of a lift
- The modernisation of worship area
- Repairs and restoration of some of the external façade
- Drainage works
- Mechanical & electrical upgrading
- Improvements to the external access

The works were completed to the satisfaction of the client, architect and conservation officer involved in this project.
